

I am totaly against this proposal, it will destroy amateur radio as we know it, and do irreparable harm to emergency communications needed in disaster situations ! This so big companies can reap more profits selling "boob tube television et. ! It is time these companies be stoped from making exorbitant profits, promoting foreign interists, and eroding the rights of the public.

This will public disaster in its own right! DON'T DO THIS !!!

Thank You,
Richard W. Keiper
